

Averil Primayuda

Software Engineer

+62 8223-0080-369 | averilprimayuda@gmail.com | Malang, East Java, Indonesia | [Portfolio](#)

Profile

I am a recent Information Technology graduate with a strong focus on Software Engineering. I have hands-on experience building web applications using PHP and Laravel, and I actively use GoLang for backend development. I also have a solid understanding of database design. I adapt quickly to new tech stacks, regularly leveraging AI tools to optimize my development workflow, and I am eager to jump in and contribute to a team right away.

Project

Integrated Social Media - [\[Project Link\]](#)

April 2025 - June 2025

- Developed a full-stack social media management web application for my undergraduate thesis.
- Architected the relational database schema and managed data connectivity using MySQL.
- Tech Stack: Laravel, PHP, JavaScript, Blade, MySQL, Git.

Go Women Center - [\[Project Link\]](#)

June 2023

- Engineered the backend architecture for a web application as the Alterra Academy capstone project.
- Collaborated cross-functionally with frontend and mobile development teams to ensure seamless API integration and system functionality.
- Designed the database schema and developed robust RESTful APIs.
- Tech Stack: GoLang, Docker, Postman.

Education

Brawijaya University | Malang

2020-2025

Bachelor of Computer Science (S.Kom.) in Information Technology

- GPA: 3.74 / 4.00
- Undergraduate Thesis: "Design and Development of a Social Media Integration Information System at Perum Jasa Tirta 1 Malang"

Certifications & Training

Alterra Academy, 100% Mastering Golang Programming

February 2023 - June 2023

- Graduated with a final score of 90/100
- Developed a scalable RESTful API using GoLang with the implementation of Clean Architecture

Organization		
RAION Community App Programmer Division		2020-2022
Contributed to the end-to-end mobile app development lifecycle, actively participating in the design, coding, and testing phases alongside team members.		
Committee
